

VINEYARDS

ORCHARDS

In Row Weed Cutter

A unique in row implement which can eliminate weeds under the vine/tree row without cultivating or contacting the soil. Ideal unit for compact tractors from 18 Hp. Unit has a self-contained hydraulic system and does not utilize any hydraulic oil from tractor. Ideal for organically farmed vineyards or orchards. Three model sizes to meet any row spacing from 4 feet and up, and plant spacing as narrow as 25 inches. Heavy duty all steel construction ensures many years of reliable and trouble-free service.

STANDARD EQUIPMENT

- | Cat. 1 three point hitch
