UNICO-T In-Row Deck Mower

A unique deck mower with a single in-row cutting head which can be off-set from the center of the tractor. Ideal for use in vineyards or orchards with wide canopies. Can also be useful along fence lines or roadsides for grass maintenance and mowing between guard rails supports. Hydraulically actuated sensor rod displaces in-row cutting head when in contact with

tree/vine trunk. Swing action operates using its own hydraulic oil pump and tank. The overall reach of the cutting deck and in-row mowing head can be adjusted using a single hydraulic remote valve from tractor. An ideal mower series to operate on compact tractors from 35 Hp and up. Heavy duty design and construction ensures many years of reliable service.

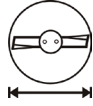

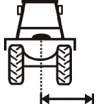

STANDARD EQUIPMENT

- | Cat. I/II three point linkage
- | 540 rpm PTO gearbox
- | 3 solid-filled rubber guage wheels
- | Fully adjustable sensor rod
- | Panoraphic off-set using hydraulic remote valve from tractor
