Spading Machine—V25/V30

Heavy duty spading machines for use in vineyards/ orchards/vegetable farming applications. Ideal for deep soil cultivation in a single pass.

Alleviate soil compaction and hard-pan. Create deep fractures in soil allowing for optimal soil aeration. Deep soil cultivation—up to 12". Incorporate amendments/compost deep into soil structure. Can operate on terraced and sloping terrain.

Standard Equipment

- | Cat. I/II—3 point linkage
- | 2-speed gear box
- | Cultivation to a depth of 10"—12"
- | Adjustable skids to control tilling depth
- | Heavy duty rear shield (adjustable) to pulverize dirt clods
- | Service-free lower spading arm nodes
- | Furnished with Cat. 4 or 5 driveline with slip-clutch protection
