

VINEYARDS

ORCHARDS

UNIVERSAL Power Disk

Mechanically driven in the row power disk implement. Operates using tractor PTO driveline. On-board hydraulic oil pump/tank to operate power disk head retraction. Fully adjustable sensor rod. Hydraulic off-set allows the implement to reach under vines/trees. Standard 3-disk gang... expandable to 4 disks to cultivate 30" wide. Available in 7 model sizes to fit most vineyards and orchard configurations. Heavy duty design and construction ensure years of reliable service.

Remote control panel for operator's station. 12V power required.

Standard Equipment

- | Cat. 1 Three-Point Hitch
- | 540 Rpm PTO Gearbox
- | Easy adjustable sensor rod
- | Hydraulic PTO pump and oil tank for sensor rod actuation

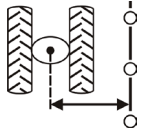

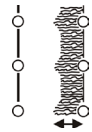

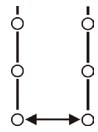

Optional Equipment

- | Hydraulic off set of unit (using tractor remote valve)
- | 3 disk gang (15" diameter)
- | Electro-hydraulic control panel for in-cab installation
- | Cat. 4 heavy duty PTO driveline
- | Additional disk kits (4-5 disk gang)
- | 18", 22" or 28" diameter disk sizes
- | Rear soil deflector/scrapper plate
